

Cloud Services in EBI

First step to move towards cloud technology

C.D. Tiwari | @cdtiwari

Technology & Science Integration,

Technical Service Cluster

EMBL-EBI, Hinxton, UK

EBI cloud services

What is it?

A cloud infrastructure based in **OpenStack** owned and operated by EMBL-EBI. It allows you to share data easily with collaborators and deploy workloads in your own cloud tenancy

How do you control resources?

EMBL GTLs sponsor tenancies for collaborators who are assigned a 12 month tenancy (renewable)

How can I use it?

Request a tenancy and you will be able to create your own VMs (IaaS), run your own Kubernetes clusters (EHK), store and share your data and much more!

Who uses it?

We already host projects like PhenoMeNal, ExpressionAtlas, SureChEMBL and collaborators such as IDR and the PanCancer Project.

2015 - Embassy v1
RedHat OpenStack 6

NFS as a Service

2017 Q1 - Embassy v2
RedHat OpenStack 9

Swift Compatible Object Store
S3 Compatible Object Store

2017 Q3 - Embassy v3
RedHat OpenStack 11

Load Balancing as a Service (LBaaS)
Federation

2019 Q3 - Embassy v4
RedHat OpenStack 13

Multi Site
Federated Access
Ceph Storage

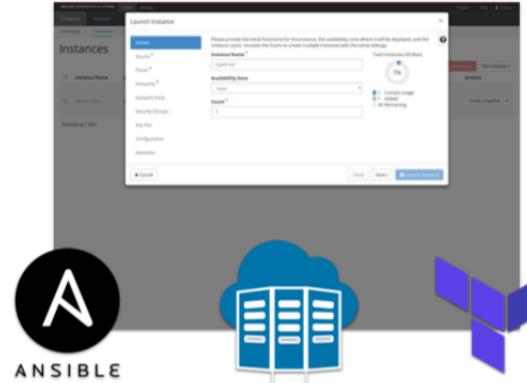

EBI cloud services

Get a Kubernetes Cluster!
(EHK - Embassy Hosted Kubernetes)

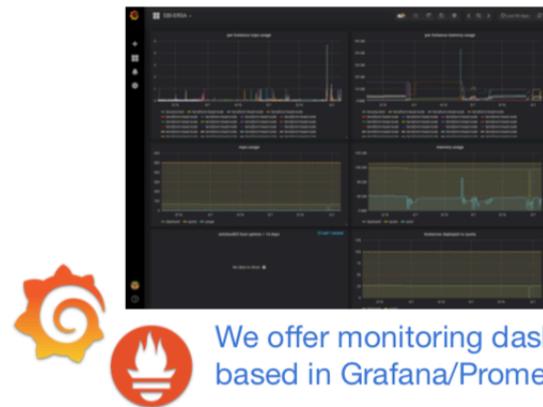

We provide you with a Kubernetes Cluster ready to use including ingress and persistent storage

Create your own VMs!
(IaaS - Infrastructure as a Service)

Deploy your workloads automatically using tools like Terraform or Ansible

Monitor your workloads!

We offer monitoring dashboards based in Grafana/Prometheus

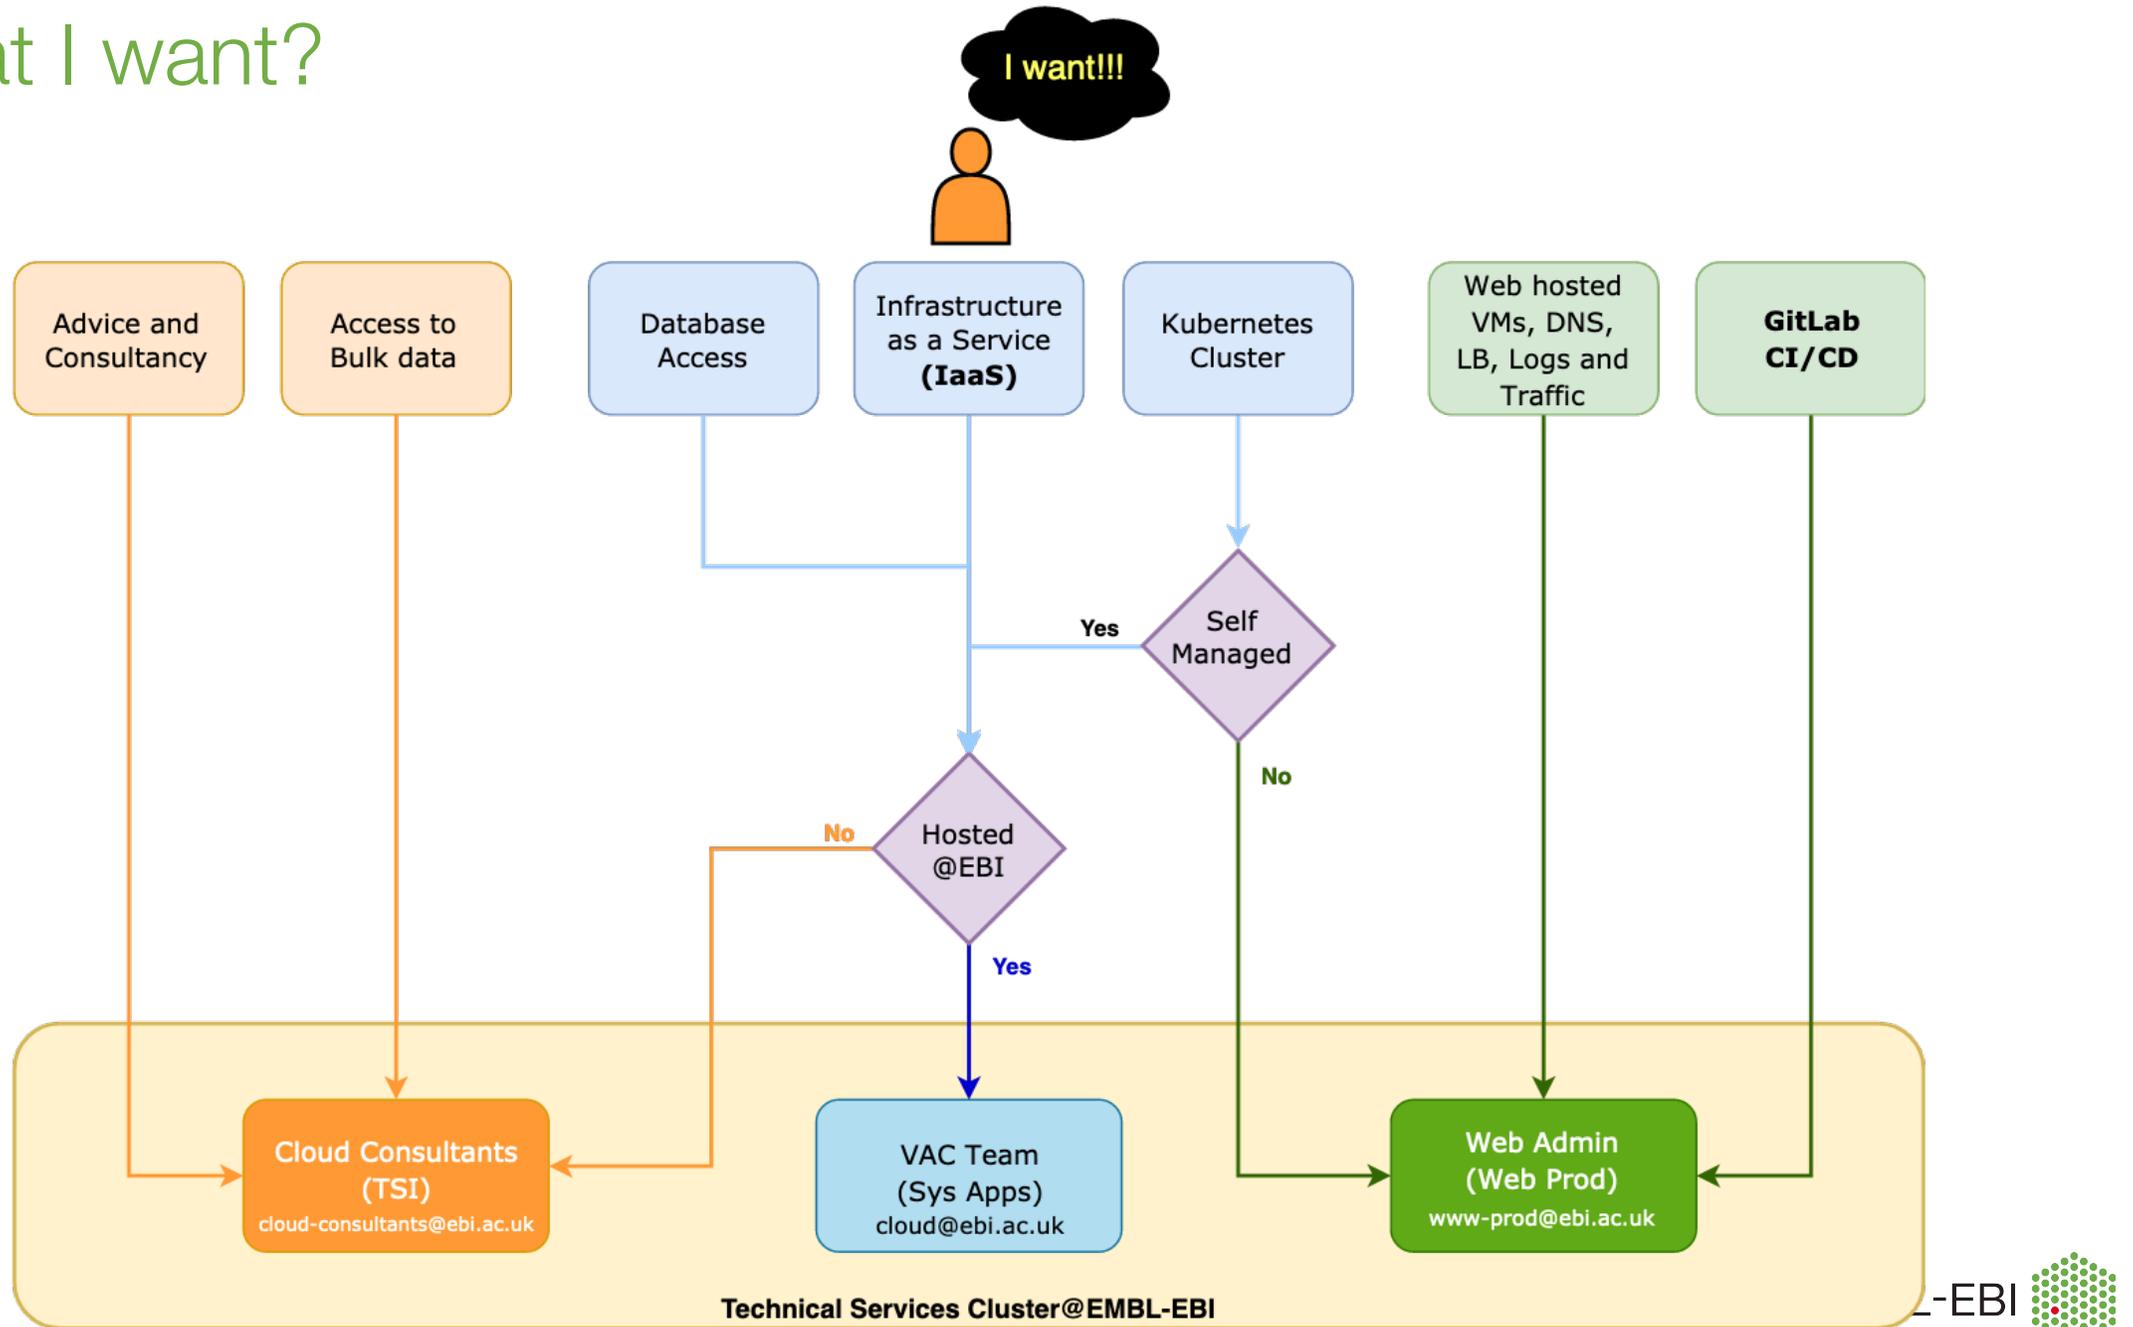

Use Cloud Native Storage and access EBI Data!

Get a S3 bucket, access EBI Datasets and Databases or use the upcoming Ceph Storage

What I want?

How to reach right team for EBI Cloud services

- Web-Prod
 - Web infrastructure
 - Collaboration tools (JIRA, **GitLab**, Confluence, OwnCloud)
 - Web VM provisioning
 - Web prod managed Kubernetes.
 - Log analysis
 - Web Traffic reports and management
 - Core web services (EBI Search)
 - URL: <http://bit.ly/tsc-webprod>
- VAC
 - Embassy Cloud(OpenStack) -IaaS
 - EHK (Embassy Hosted K8s)
 - Services included:
 - Cloud Native storage
 - Monitoring workloads
 - Prometheus & Grafana
 - URL: <https://tsc.ebi.ac.uk/cloud>

Thanks, Our team.
